Mr. Edward L. Irvin
25 Bayberry Lane
Salisbury, Massachusetts 01950

Dear Mr. Irvin:

Your letter of December 31, 1980 concerning the K.H. Quinn Company has been referred to this office for reply.

We have been made aware by New Hampshire of the improper disposal of wastes which occurred in Seabrook, and the results of their investigation. The latest information from the State indicates that although contamination was detected in the groundwater, it does not appear that the contamination plume has moved off site. The area continues to be monitored, and two more monitoring wells have been installed in addition to the previous three.

We have also been advised by the state that they have been in close communication with local officials in Seabrook concerning their investigation, and that the Massachusetts DEQE has also been made aware of this situation. The Salisbury Water Company is also maintaining a program of sampling and analysis of the Salisbury wells.

If you have any further questions on this please contact Ruth Leabman of my staff at 223-3468.

Sincerely yours,

John Hackler, Chief
Office of Uncontrolled Waste Sites
